

Application

The 7000 Series lockset provides fully mechanical primary or auxiliary pushbutton access control with no electrical wiring, electronics, or batteries. Exterior access is by combination. Egress is by interior thumbturn and is free at all times. Deadbolt models are manually relocking. Deadlocking latch models automatically relock each time the door closes.

7000 Series locksets are suitable for residential or light commercial applications. The streamlined housing with integrated pull makes the lock ideal for front and rear doors, garages, conference rooms, offices, garden cabanas, utility rooms and workshops. Mounts above existing lockset, or can be used alone.

The pushbutton design eliminates problems associated with the issue, control, and collection of keys and magnetic cards. The combination can be quickly and easily changed to ensure continued maximum security once employees, tenants, or guests leave, saving the cost of new keys, key cylinders, magnetic cards, and card-encoding devices. The combination is changed without removing the lock from the door.

Features

One hand operation: Depress the buttons in the correct sequence, then turn the thumbturn to retract the bolt or the deadlocking latch.

Thousands of possible combinations: Authorized individuals can change the combination in seconds. One or all five buttons can be used in the combination - individually or with two or more buttons depressed simultaneously.

Easy to install on wood or metal doors: Easily retrofits primary or auxiliary lock installations. Exterior trim plate covers existing 2 $\frac{1}{8}$ " (54mm) bores.

Rugged & weather resistant: The lock is wear-tested for intensive use. Suitable for indoor or outdoor locations.

Includes: Strike for in-swing and out-swing doors (appropriate to latch type), strike box, installation instructions, full-scale template.

Latch holdback: Standard on rim deadlocking latch models.

Specifications

Construction: All metal; cast front housing; force-proof clutch-protected thumbturn; exterior brass trim plate; interior reinforcing plate for rim deadlocking latch models;

Door thickness: 1 $\frac{3}{8}$ " (35 mm) to 2 $\frac{1}{4}$ " (57 mm)
